

PEN SEREY OTDOM

Software Engineer

+855 87 307 585

pensereyotdom19@gmail.com

Phnom Penh, Cambodia

EDUCATION

Bachelor's in Software Engineering

Kirirom Institute of Technology

2015 - 2019

TECHNICAL SKILLS

Languages

- Python, PHP, JavaScript, HTML,CSS

Frameworks & Tools

- Django REST Framework, Laravel, APIATO, React.js

Databases

- MySQL, SQLite

Core Skills

- REST APIs, System Design,
- API Integration, Database Design,
- Performance Optimization,
- Agile Development, Troubleshooting

AI & Development Workflow

- ChatGPT (GPT), OpenAI Codex, Claude (Anthropic)

LANGUAGES

- Khmer (Native)
- English (Professional Proficiency)

About Me

Backend Software Engineer with 7 years of experience building transactional business systems in Python (Django REST Framework) and PHP (Laravel). At Squeeze Asia, develops core services for suitebook, a hotel management platform, covering bookings, payments and refunds, kiosk and QR checkout, account settlement, and channel manager integrations. Skilled in REST API design, relational data modeling, and debugging production issues in money-handling workflows where correctness matters. Full-stack capable with React.js, and uses AI coding tools (Claude, Codex) daily for debugging, code review, and documentation.

WORK EXPERIENCE

Squeeze Asia - May 2022 - Present

Software Engineer

SuiteBook (Hotel Management System)

Technologies: Python (Django REST Framework), React.js, MySQL, SQLite

• Developed and maintained core modules including room booking, guest management, IC card activation, account settlement/unsettlement, kiosk payment, and QR payment workflows.

• Designed and implemented RESTful APIs for frontend and third-party integrations.

• Built and improved responsive UI components using React.js.

• Designed refund handling as offsetting negative payment entries rather than mutating original records, keeping the payment ledger auditable and settlement totals consistent across properties.

• Built per-property kiosk search configuration using bitmask flags, letting buildings customize behavior without schema changes or redeploys

• Resolved channel manager (site controller) integration failures caused by mismatched OTA account IDs and room type codes, restoring inventory and rate sync for properties.

• Collaborated with PM, SQA, and engineering teams to deliver stable and reliable solutions.

A2A - Nov 2019 - Apr 2022
Software Engineer

Land Map (Property Platform)

Technologies: PHP (Laravel, APIATO)

• Developed backend APIs for property listing, buying, selling, and renting.

• Enhanced scalability and maintainability using APIATO architecture.

• Designed efficient database structures and transaction workflows.

Minami Dictionary (Mobile Application)

Technologies: PHP (Laravel, APIATO)

• Built backend services for a Khmer-Japanese language-learning platform.

• Optimized search functionality and data retrieval performance.

TM Matching System (Internal Tool)

Technologies: PHP (Laravel, APIATO)

• Developed an internal platform to automate business matching processes.

• Implemented backend logic to improve workflow efficiency.

OTHER PROJECTS

A2A Odoo Renovation Mar 2019 - Oct 2019

• Migrated an ERP system to a newer Odoo version while maintaining data integrity and system continuity.

Resort Booking System - vKirirom Pine Resort Jul 2018 - Mar 2019

• Developed backend functionality for booking accommodations and activities and improved reservation workflows.

Smart Check-in/Check-out System - vKirirom Pine Resort Jul 2017 - Apr 2018

• Built a QR-based mobile room-access/check-in solution to reduce manual processes.
